

2. (Original) The carrier system of claim 1, wherein the container tubes are removably securable to the body member via a frictional attachment between exterior surfaces of the tubes and interior surfaces of the first openings.
3. (Original) The carrier system of claim 1, wherein the first openings are arranged perpendicular to the second openings.
4. (Original) The carrier system of claim 1, wherein the first openings have a first diameter, the second openings have a second diameter, and the first diameter is different from the second diameter.
5. (Original) The carrier system of claim 1, wherein the ridge member extends substantially along a length of the body member.
6. (Original) The carrier system of claim 1, wherein the second openings are adapted to receive and frictionally retain a shooting accessory therein.
7. (Original) The carrier system of claim 1, further comprising a lanyard, the lanyard for securing the carrier system to a user, and the lanyard being connectable to an attachment opening disposed in the ridge member.
8. (Original) The carrier system of claim 1, wherein the body member and the ridge member are molded from a flexible elastomeric material, and wherein the first and second openings are expandable to receive and frictionally retain therein accessories, wherein when the accessories are removed from the first and second openings, the first and second openings return to a pre-expansion dimension.
9. (Original) The carrier system of claim 1, wherein the container tubes provide watertight storage of accessories stored therein.

Claims 10-28 (Cancelled)
